DETAILED ACTION

1. This communication is in response to the amendments filed on 07/06/2009.

After thorough search and examination of the present application and in light of the prior art made of record, claims 1-9, 11, 36-38, 51-52, 54, 56-57, and 59-63 (renumbered as 1-23) are allowed.

Claims 10, 12-35, 39-50, 53, 55, and 58 have been cancelled.

Reason for Allowance

2. The prior art made of record does not teach or fairly suggest the combination of elements, as recited in independent claims 1, 36, and 60.

More specifically, the prior art of records does not specifically suggest the combination of “an act receiving a Web based request for a Web based response that is to include the interim results subsequent to caching the interim results in the cache entry, the web based request corresponding to a page file which includes one or more scripts to be executed to determine the Web based response; an act of determining how to access the interim results for inclusion in a Web based response based on the results of comparing the versioning information and in response to receiving the Web based request for the portion of content, the act comprising an act of determining that the interim results are to be reconstructed from the one or more records in the selected data table and one or more records in one or more other data tables; an act of accessing the interim results in accordance with the determination, the act comprising an act of reconstructing the interim results from one or more records in the selected data table

Art Unit: 2166

and the one or more records in the one or more other data tables notwithstanding that interim results were cached at the computer system when the Web based request was received; an act of assigning a database cache dependency to at least a portion of the constructed Web based response, the executed commands defining at least one database and at least one table on which the database cache entry is dependent, and further defining the portion of the constructed web based response on which the cache dependency is dependent” in combination with all the other limitations in the independent claims 1, and 36.

Further, the prior art of records does not specifically suggest the combination of “an act of constructing first interim results from a collection of records, including a plurality of records in the selected data table and one or more records from one or more other data tables, the first interim results usable in the generation of a plurality of different Web based responses; an act of constructing second interim results from a collection of records, including a plurality of records in the selected data table and one or more records from one or more other data tables, the second interim results usable in the generation of a plurality of different Web based responses and dependent on the first interim results; an act of caching the first interim results in a database dependent cache entry in the cache, the database dependent cache entry including the versioning information identifying and corresponding to the selected data table; an act of caching the second interim results in a key dependent cache entry in the cache, the key dependent cache entry including a key dependency to the database dependent cache entry, the key dependency indicating that the key dependent cache entry should be

Art Unit: 2166

invalidated by the database dependent cache entry when a change to a record in the selected data table is detected; an act of the database dependent cache entry invalidating the key dependent cache entry for the second interim results” in combination with all the other limitations in the independent claim 60.

These features together with other limitations of the independent claims are novel and non-obvious over the prior art of record. The dependent claims 2-9, 11, 37-38, 51-52, 54, 56-57, 59, and 61-63 being definite, enabled by the specification, and further limiting to the independent claims, are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
